

# Large-signal Equiv. Circuit Model for Ring Modulator

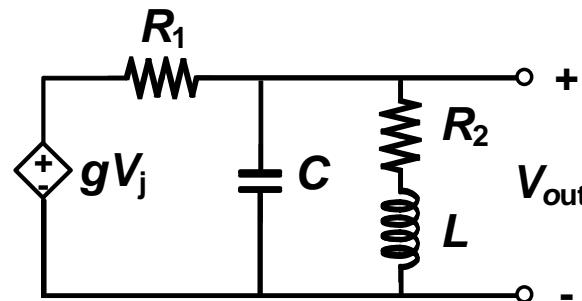

Will be presented on 2018 OFC

<Measured Transmission Curve>

+ D  
(Detuning)

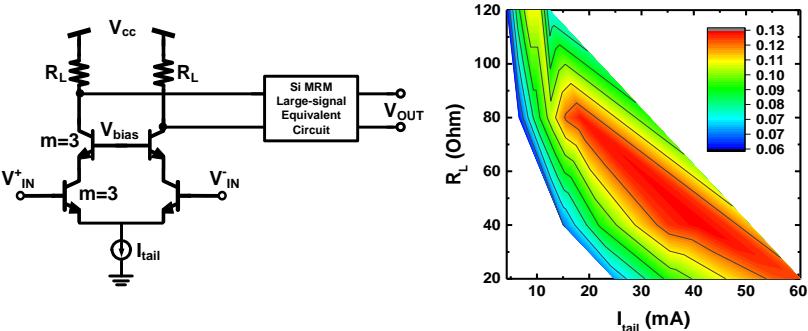

<Small-signal Equivalent Circuit>

$n_{\text{eff}}, \tau_1, \tau, D$   
determine  
RLC  
values

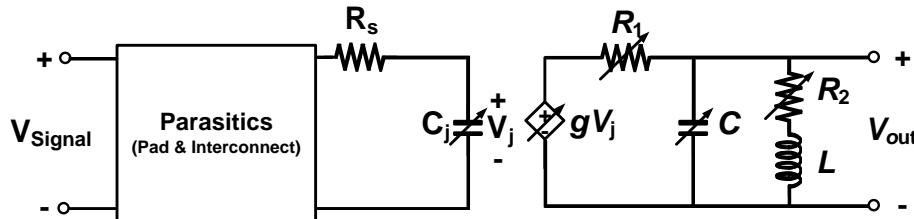

✓  $n_{\text{eff}}, \tau_1, \tau$  extracted

<Large-signal Equivalent Circuit>

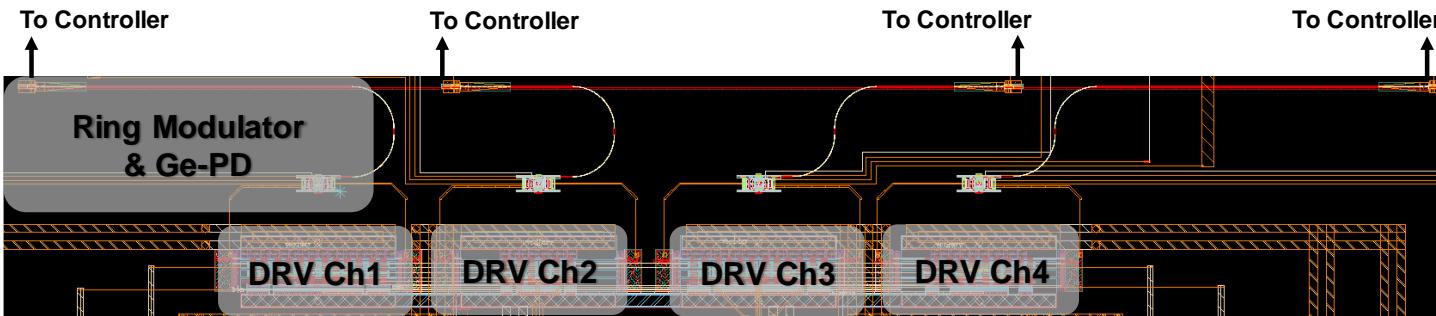

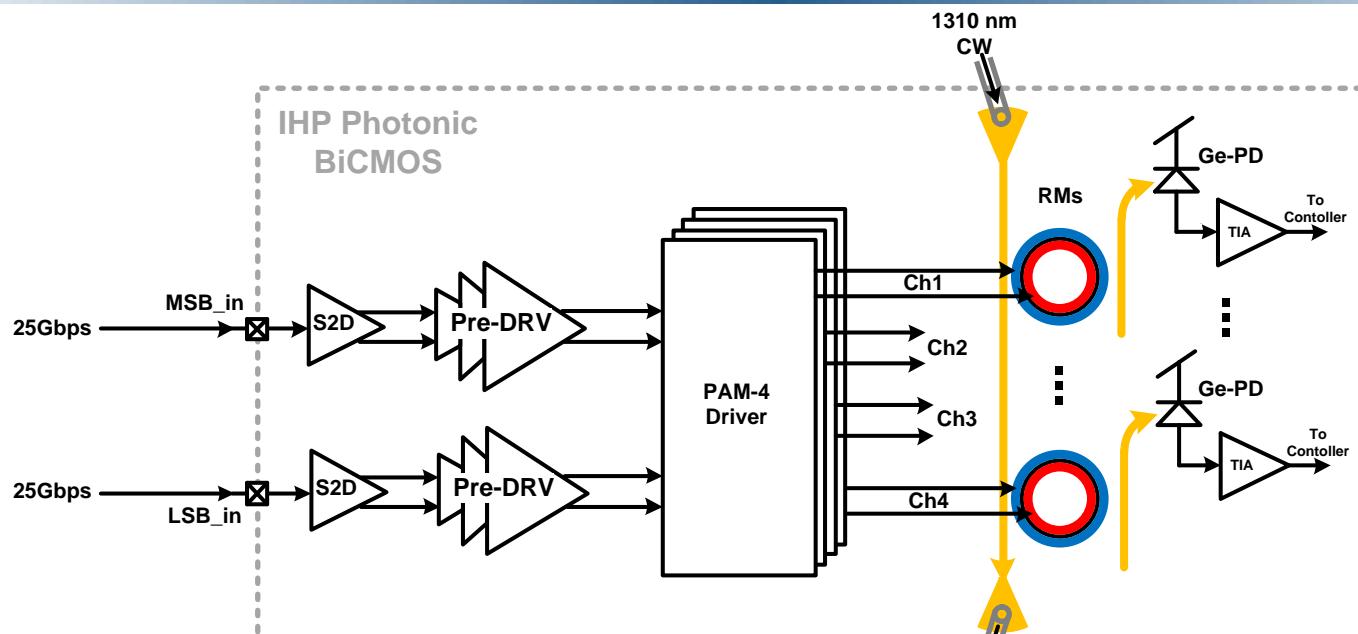

✓ Co-simulation & design optimization

<Large-signal Equivalent Circuit>

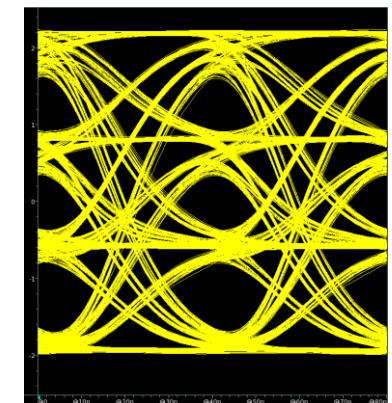

✓ Non-linear voltage-dependent elements  
achieved with SPICE model

# Photonic BiCMOS PAM-4 Transmitter

<Layout of PAM-4 Tx>

<50-Gbps Simulated Result>

# Optical PAM-4 Transmitter with RLM Calibration
